

# Technical aerosols for maintenance and repair workshops

**Callington's Aviation Maintenance Chemicals are sold to over 150 airlines, MRO and ground handling companies around the globe.**

MRO Line™ is the range of specialist technical aerosols for the demanding technicians and workshops of the aircraft Maintenance Repair and Overhaul companies. MRO Line™ is growing to bring you more and more efficient aerosol solutions.

Range designed for maintenance and repair workshops.

Practical 250-500ml aerosols.

Aerosol propellants complying with EU regulation on fluorinated greenhouse gases Low Global Warming Potential (GWP).

Recyclable 3-piece cans  
Manufactured in the E.U.

**x8** aerosols solutions already available :

- Dielectric Cleaner**
- Leak Detector**
- Freezer**
- Blower**
- Solder Flux Cleaner**
- Brake Cleaner**
- Label Remover**
- Cleaning Foam**

# MRO Line™

## TECHNICAL AEROSOLS FOR MRO WORKSHOPS

### MROLine™ Dielectric Cleaner

Non-flammable aerosol. HFO propellant. Hydrochlorofluorocarbon solvent for the cleaning of live electric and electronic devices, electronic printed circuit boards of computers and aerospace equipment's. Quick evaporation without streaks. Compatible with most metals, plastics and elastomers. Practical extension tube.

| Product code | Product format | Units / Carton | Carton Weight (Kg) |
|--------------|----------------|----------------|--------------------|
| AR0000051    | 250mL aerosol  | 12             | 5.1                |

### MROLine™ Solder Flux Cleaner

Carbon dioxide propellant. Extremely flammable aerosol. Solvent mixture designed for the cleaning of printed circuit boards and removal of welding flux. Clean and removes all traces of residues after welding and prepare surface for varnishing. Practical brush on actuator.

| Product code | Product format | Units / Carton | Carton Weight (Kg) |
|--------------|----------------|----------------|--------------------|
| AR0006522    | 400mL aerosol  | 12             | 5.4                |

### MROLine™ Leak Detector

Non-flammable aerosol. Nitrous oxide propellant. Aqueous solution sprayed to easily detect gas leaks on circuits and connections such as pipes, air valves, taps and conduits. Quick detection thanks to the onset of visible bubbles on the surface.

| Product code | Product format | Units / Carton | Carton Weight (Kg) |
|--------------|----------------|----------------|--------------------|
| AR0006521    | 400mL aerosol  | 12             | 6.4                |

### MROLine™ Brake Cleaner

Butane-Propane-Carbon dioxide propellant. Extremely flammable aerosol. Blend of non chlorinated and non-aromatic solvents designed for the effective cleaning and degreasing of metal surfaces and brake systems. Quickly dissolves grease on surfaces and removes dirt from mechanics.

| Product code | Product format | Units / Carton | Carton Weight (Kg) |
|--------------|----------------|----------------|--------------------|
| AR0000038    | 500mL aerosol  | 12             | 6.5                |

### MROLine™ Freezer

Non-flammable aerosol. Nitrous Oxide propellant. Designed to cool and shrink metal pieces in workpieces, such as pipes or ball bearings. Released liquified gas allows a cool down to -40°C. Used also on electronic printed circuit boards to quickly identify heating and malfunctioning components. Extension tube to access narrowest places.

| Product code | Product format | Units / Carton | Carton Weight (Kg) |
|--------------|----------------|----------------|--------------------|
| AR0000047    | 500mL aerosol  | 12             | 6.4                |

### MROLine™ Cleaning Foam

Butane-Propane propellant. Extremely flammable aerosol. Water based cleaning solution sprayed in the form of a foam, designed for the effective cleaning of polar and organic soils, on plastics, elastomers, polymers, and also metals. Very effective formulation; removes stubborn dirt and traces. Clings to vertical surfaces, does not flow. Neutral odor.

| Product code | Product format | Units / Carton | Carton Weight (Kg) |
|--------------|----------------|----------------|--------------------|
| AR0006483    | 500mL aerosol  | 12             | 7.1                |

### MROLine™ Blower

Non-flammable aerosol. HFO propellant. Designed to clean dusty surfaces by quickly and easily blowing on them. Also, for the drying of surfaces. Odorless, colorless gas. Completely dry, it doesn't alter any materials. Extension tube for place difficult to access.

| Product code | Product format | Units / Carton | Carton Weight (Kg) |
|--------------|----------------|----------------|--------------------|
| AR0000048    | 500mL aerosol  | 12             | 6.3                |

### MROLine™ Label Remover

Butane propellant. Extremely flammable aerosol. Hydrocarbon mixture especially designed to effortless remove from surfaces the labels and sticky traces of labels. Non-abrasive formulation, safe for metal and plastic surfaces. Easy to use, avoids long and tedious cleaning.

| Product code | Product format | Units / Carton | Carton Weight (Kg) |
|--------------|----------------|----------------|--------------------|
| AR0000039    | 500mL aerosol  | 12             | 5.6                |
