

## Armite's ZP-770 Zinc Anti-Seize Compound

Commercial Grade

Prevents seizing and galling during assembly and disassembly of aluminum and aluminum alloy parts, engaged with components of similar or dissimilar metals.

1. PREVENTS SEIZING AND GALLING
2. PROTECTS AGAINST CORROSION

### DESCRIPTION

Armite's ZP-770 is an anti-seize compound formulated from zinc powder, specialty oils, and grease for use on aluminum fasteners. ZP-770 is especially effective when fasteners are associated with ferrous components.

ZP-770 helps reduce repair times when applied at every service interval. It is an excellent anti-seize in harsh environments.

### ADDITIONAL INFO

**Available in:**

- 12 oz. brush top can
- 1 lb. plain top can

**Typical Characteristics:**

- Color: Grey
- Physical State: Semi-solid paste
- Flash Point: 404°F (206°C)
- Additive type: Zinc

**Note:** Products listed are suggestions. The information on this site will not replace your testing and evaluation procedures. Ultimate product selection should be based on your test results and the specific performance requirements.
